PRATIK S. DESHMUKH

Website: pratikdeshmukh.co.in|**Mobile**: +917066688654 |**Email:** pratik.s.deshmukh@outlook.com|**Location:** Amravati, Maharashtra

PROFESSIONAL SUMMARY

Detail-oriented support professional with a strong foundation in international non-voice customer care and hands-on experience managing Linux server environments. Demonstrated ability to resolve US and UK client escalations, adhere to service guidelines, and partner with QA teams. Applies practical troubleshooting skills in networking, cloud architecture, and Microsoft 365 administration to efficiently navigate technical workflows. Highly motivated to transition this dual background into a dedicated non-voice technical support role.

EDUCATION & CERTIFICATIONS

B.Sc. Physics, Electronics & Mathematics | Adarsha Mahavidyalaya, SGBAU, Amravati

Certification: Maharashtra State Certificate in Information Technology (MS-CIT)

TECHNICAL SKILLS

- **Cloud & Infrastructure:** Oracle Cloud Infrastructure (OCI), Linux server management, Alpine Linux, ARM64/x86 workload distribution.
- **SaaS & Identity:** Microsoft 365 Administration, Microsoft Entra ID (Azure AD), Identity & Access Management (IAM), RBAC.
- **Networking & Security:** Zero-trust networking, Tailscale mesh, Cloudflare Tunnels, hybrid DNS, WireGuard (wg-easy), SSH, CrowdSec.
- **Containers & Services:** Docker, Portainer, Watchtower, containerd, host networking, Nginx Proxy Manager (NPM), systemd
- **Monitoring & Backups:** Prometheus, Grafana, Node Exporter, Uptime Kuma, Dozzle, Restic.
- **Troubleshooting & Tools:** CPU steal-time analysis, iperf3, Windows OS management, Microsoft Office Suite, basic hardware troubleshooting.
- **Professional Skills:** Customer communication, escalation handling, quantitative and qualitative analysis, decision-making, active listening, time management, mentoring.

WORK EXPERIENCE

Customer Care Executive | Teleperformance |

- Handled an international non-voice process for an e-commerce platform, supporting customers in the US and UK.
- Resolved account inquiries and order-related issues while following company procedures and service guidelines.
- Maintained working knowledge of evolving process protocols to provide accurate, timely resolutions.
- Collaborated with Operations and Quality Analysts (QA) to address and rectify process-related issues.
- Coordinated with internal teams and supervisors to manage escalated customer concerns.
- Completed mentor training and supported associates with guidance on complex process queries.

PROJECTS & INFRASTRUCTURE EXPERIENCE

1. Microsoft 365 & Identity Administrator Sandbox | *Personal Project*

- **Tenant Administration:** Managed a Microsoft 365 Developer environment as a Global Administrator, configuring tenant-wide settings, domains, and security policies.
- **Identity & Access Management:** Provisioned users and groups via Entra ID (Azure AD) and implemented Role-Based Access Control (RBAC).
- **SaaS Troubleshooting:** Navigated the Microsoft 365 admin center to simulate resolving common corporate helpdesk escalations.

2. Cloud & Infrastructure Administrator — Zero-Trust Cloud Architecture | *Personal Project*

- **Cloud architecture & orchestration:** Designed and deployed a multi-node compute cluster on Oracle Cloud Infrastructure (OCI), distributing containerized workloads across ARM64 compute nodes and x86 stateless edge workers.
- **Zero-trust security & networking:** Configured an encrypted Tailscale peer-to-peer mesh to avoid open inbound OCI ports and reduce direct exposure to external port scans.
- **Traffic ingress & access control:** Implemented hybrid DNS routing, keeping administrative dashboards such as Grafana and Portainer on private Tailscale IPs while routing public web traffic through Cloudflare Tunnels on an edge node.
- **Performance optimization:** Investigated CPU steal-time degradation exceeding 40% on fractional micro instances. Migrated continuous-polling telemetry containers to host networking; observed a reported 95% reduction in kernel-level context switches.
- **Observability & security stack:** Deployed Prometheus, Grafana, Dozzle, and CrowdSec, alongside Nginx Proxy Manager and WireGuard for monitoring, security, reverse proxying, and secure remote access.
